About Us

Welcome to DOM's Bytes, where passion for pizza meets the art of coding! Located in the heart of Pittsburgh, with branches in Cranberry and Squirrel Hill, we're dedicated to crafting custom pizzas as unique as your favorite algorithms.

At DOM's Bytes, we believe that every pizza is a masterpiece waiting to be created. Our menu features a variety of specialty pizzas that change weekly, ensuring there's always something new to try. Whether you're in the mood for our vibrant Array of Veggies, the hearty Byte of the Beast, or the nostalgic Primitive Cravings, we have something to satisfy every craving.

For the adventurous, we present the Compiling Error—a pizza that pushes the boundaries of taste (and common sense) with its daring combination of strawberries and anchovies. As we like to say, "You don't want this one..." but we dare you to try!

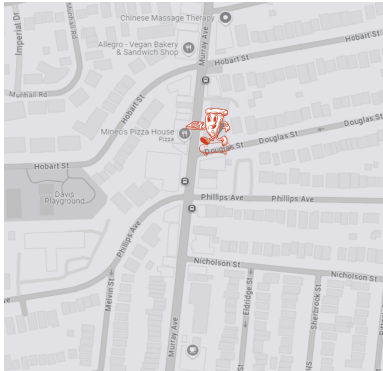

Whether you're ordering for delivery or picking up your piping-hot creation, our team is here to ensure you enjoy every byte. Join us at DOM's Bytes, where every slice is a code-breaking experience!

Specialty Pizzas

Array of Veggies - \$28.00

Topped with burrata cheese for a soft touch and roasted peppers for a spicy kick, this flavor stack is sure to please. Artichokes add complexity, while onions keep it transparent. Black olives introduce a dark theme, and green peppers add freshness, with juicy tomatoes as the perfect sauce. This pizza is debugged and ready for deployment, ensuring every bite is a tasty success!

Byte of the Beast - \$28.00

This pie is packed with Italian meatballs for robust performance, chicken for a lightweight framework, and bacon for a crisp interface. Mozzarella holds it all together, while pepperoni brings the heat, and sausage and ham ensure it's fully loaded. Each bite is a meaty algorithm perfectly executed. Debug your hunger with this savory, error-free masterpiece!

Primitive Cravings - \$16.00

Featuring fresh mozzarella for a smooth user experience, tomatoes that deliver robust flavor with every bite, and basil for a refreshing update. All on a crisp crust that's the perfect foundation for this simple yet elegant codebase. It's a minimalist's dream, optimized for taste with no extra frills—just pure, error-free deliciousness!
